MARIN CITY HEALTH & WELLNESS CENTER AWARDED HRSA GRANT

The pro bono website created and developed by Marsh Marketing and Colophon New Media in 2010 for the Marin City Health & Wellness Center -- [www.marincityclinic.com](http://www.marincityclinic.com) <<http://www.marincityclinic.com>> , was awarded a U.S. Department of Health and Human Services grant (HRSA) in excess of \$1 million in August 2011. The grant application process took almost a year's time and the money will go a long way toward providing basic, free medical care to many under-privileged citizens of Southern Marin County, California.

The donated website helped establish legitimacy to the clinic that had previously not existed, and was a contributing factor in winning the HRSA grant. We are grateful, knowing that the 8-week web development project brought to our attention by Consultant Kim Pipkin will make a difference in the lives of many people.
